

## Tokyo-Yokohama, Taipei-Keelung: Infrastructure and Port Societies as Stratified Landscapes

### Concept:

As capital cities open to the world, their infrastructures and port societies may transform, yet persist as layered landscapes shaped by civil engineering, architecture, and urban planning. These historical strata, while sometimes destroyed in war or disaster, can also temporarily sustain everyday life. This symposium opens with Sayaka Uehara, whose photography traces spirits and histories embedded in the landscape. Focusing on the Tokyo-Yokohama and Taipei-Keelung axes through the lens of Okinawa, we ask: how can we reinhabit and reappropriate these spaces? Bringing together scholars from Tokyo and Taipei, the meeting explores historical and methodological approaches to infrastructure and aims to build paths for future collaboration.

**Date and Time:** 10:00-12:00, 7/28 Mon.

**Venue:** Civil Engineering Dept. Bldg., National Taiwan University

**Organizer:** International Institute for Next Urban Planning, Design and Management & International Studies Unit for Next Urban Planning, Design and Management, the University of Tokyo

### Program:

#### 10:00~10:20 Opening Remarks

##### Introduction

羽藤英二 **Eiji HATO** | Professor, the University of Tokyo

陳柏華 **Albert CHEN** | Professor, National Taiwan University

##### Perspectives on Taiwan and Okinawa

上原沙也加 **Sayaka UEHARA** | Photographer

#### 10:20~10:40 Session 1: Infrastructure Maintenance and Management

##### Introduction of Taipei City Road Network Pavement Management System

周家蓓 **Chia-pei CHOU** | Distinguished Professor, National Taiwan University

##### Causal and Machine Learning-Based Repair Scheduling under Pavement Deterioration Uncertainty

須賀理帆 **Riho SUGA** | Master Student, the University of Tokyo

#### 10:40~11:00 Session 2: Infrastructure & Transportation Network Planning

##### Residential Capacity in the Mid-River Region of the Tamsui River

許聿廷 **Yu-Ting HSU** | Associate Professor, National Taiwan University

##### History and Geology Issue of Transportation between Taipei-Keelung

謝沛宸 **Pei-Chen HSIEH** | PhD.

#### 11:00~11:20 Session 3: Urban and Infrastructure Planning from a Historical View

##### Port Development in Keelung and Tamsui River Improvement Works in Taipei

簡佑丞 **Yu-Chen CHIEN** | Assistant Professor, National Taipei University

##### Territorial History of Yokohama and Tokyo

中尾俊介 **Shunsuke NAKAO** | Assistant Professor, the University of Tokyo

#### 11:20~12:00 Discussion

**Moderator:** 邱文心 **Wen-Xin QIU** | Project Assistant Professor, the University of Tokyo
